

AVAYA spaces™

Quick Start Guide

LOGGING IN

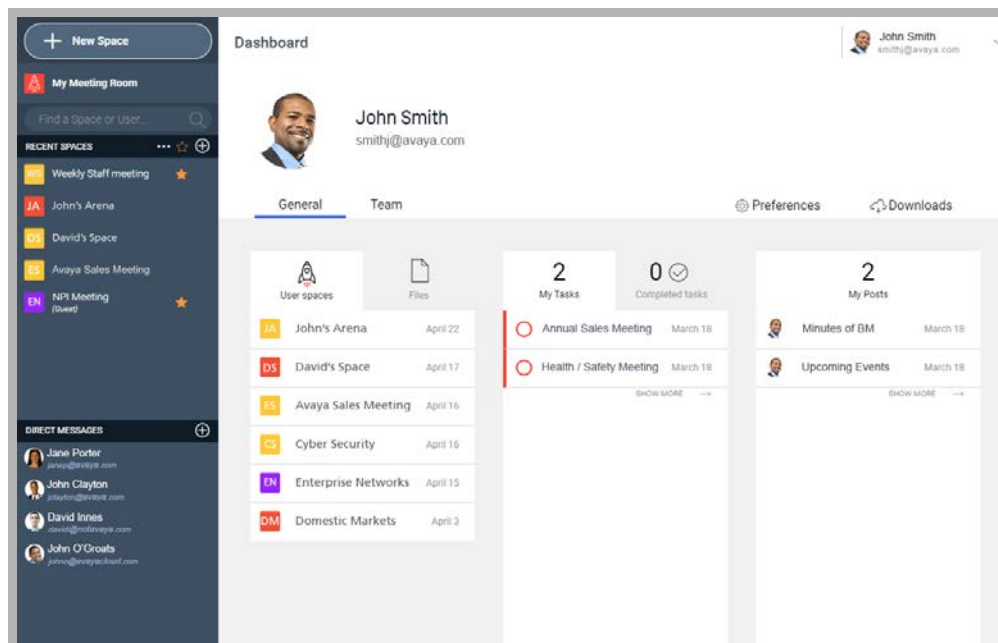

Avaya Spaces™ operates entirely within the **Chrome** web browser. No software is required.

Go to spaces.avayacloud.com.

- For corporate users, your administrator will have setup your account using your company credentials (i.e. Windows, Salesforce, Office365, Google or a Corporate SSO). Enter your email address, then click the appropriate method and follow the on-screen instructions to login.

- Individual users will have to create an account first. Enter your email address, then click **Yes, Sign me Up!** You will receive a confirmation email. Use the link in the email to confirm your account creation. When prompted, enter any additional requested information and a password.
- Avaya Spaces will launch at the program dashboard.

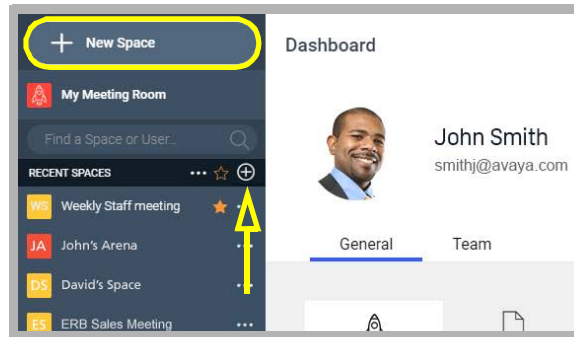

- On all future logins, entering spaces.avayacloud.com into the Chrome address bar will bring you to the dashboard directly without the need to login again. You will only need to enter your credentials if you logout of Spaces.

LET'S GET STARTED

Create a New Space

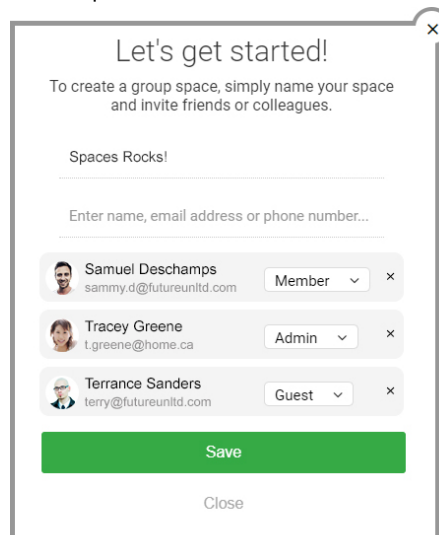

Click **New Space** or use the  button to create a new hub for your next project team.

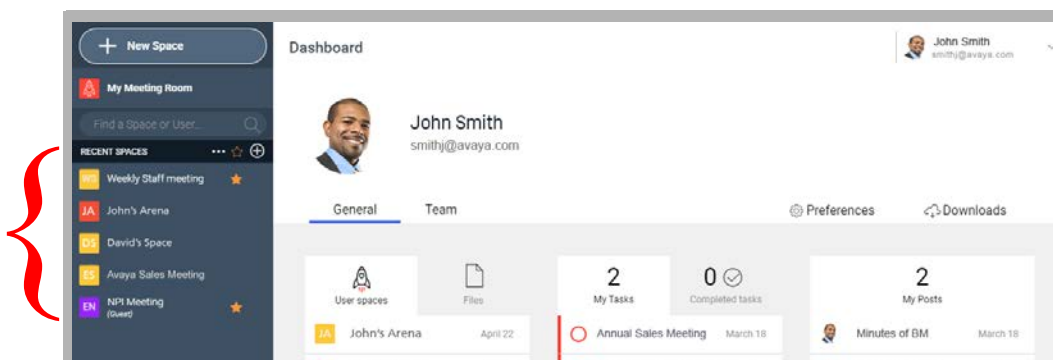

Give your new Space a name.

Enter the name, email address or phone number for all of the people you want to add. Assign each to the **Admin**, **Member**, or **Guest** category.

Click **Save** when your Space is complete.

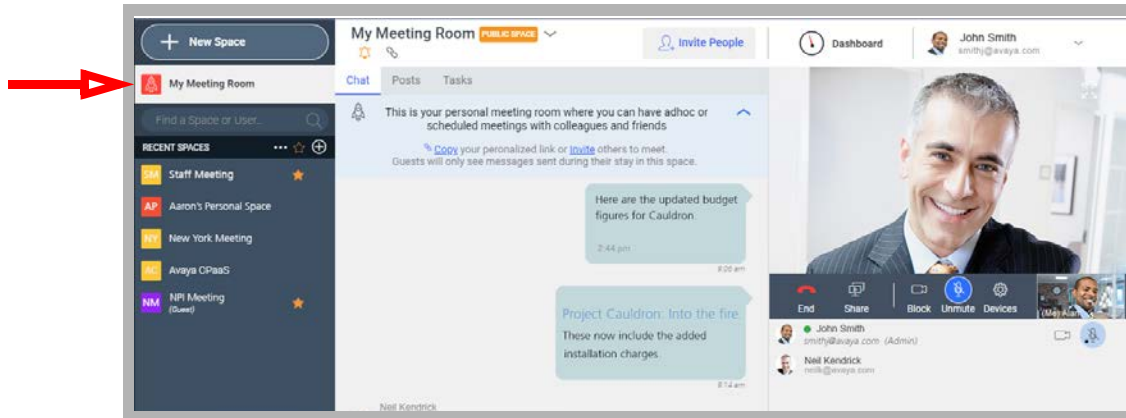

It appears in the **Recent Spaces** pane. Click on a Space to launch that Space.

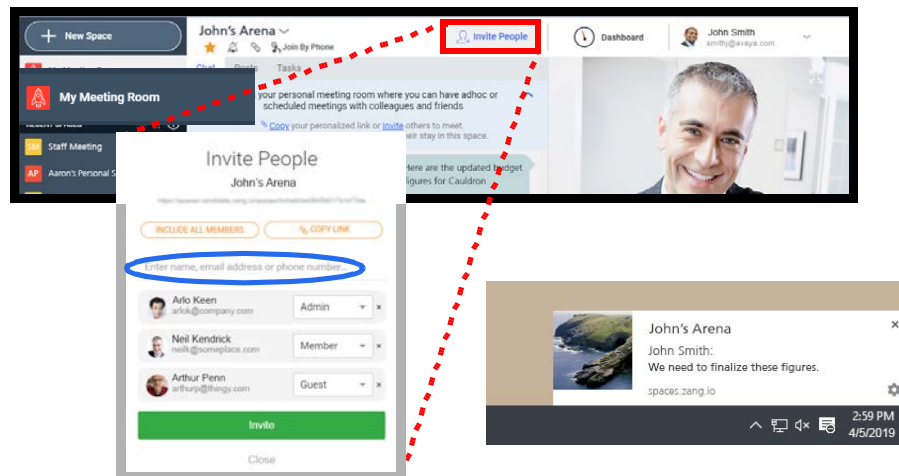

My Meeting Room

The **My Meeting Room** button opens a Space where you can invite people to join you. This room functions like any other Space, but everyone that you invite can only have Guest privileges.

INVITING PEOPLE

Enter the Space, click **Invite People**, and start typing. Enter the email addresses of the contacts you want to add. Specify if they will be an **Admin**, **Member**, or a **Guest**.

Copy Link: For contacts that cannot be reached by other means, click **Copy link** and paste it into an email to the contact. When they click the link, they will join the meeting as a guest.

Once your list of invitees is complete, click **Invite** to send the invitations and launch the meeting.

Assigning Rights

For each person you add to the Space, you must specify each as either Admin, Member, or Guest. By default, invitees are Members.

- **Guest:** Only have access to the Chat tab. Tasks, Posts, and Chat history are not available.
- **Member:** Can view all tabs and chat history.
- **Admin:** These are Members who can also add and remove people from the Space.

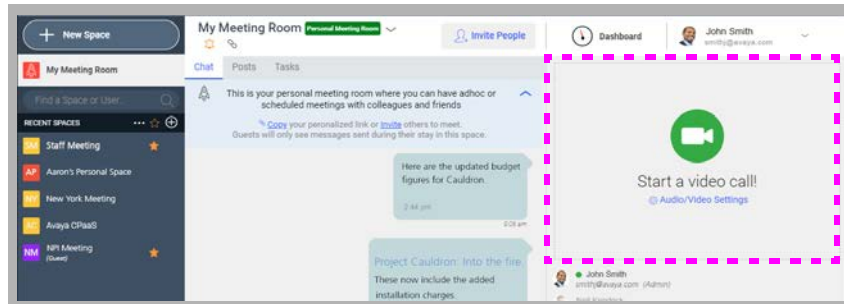

STARTING A MEETING

Clicking on any Space in **Recent Spaces**, or selecting **My Meeting Room**, will launch that Space in the main window.

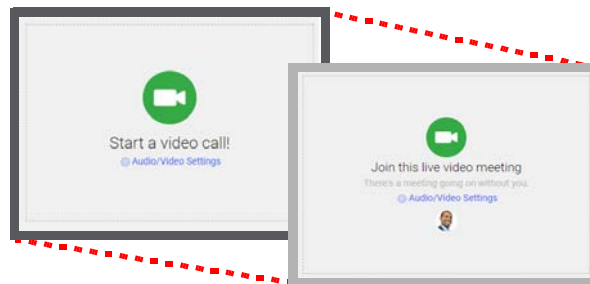

Use the main window to conduct chat sessions, share files and assign tasks with everyone in the Space.

Launching a Video Conference

The video panel is in the top right-hand corner of each Space.

Click in the video window. Your webcam and microphone will activate and the conference will begin. Everyone who is part of the Space, and who has the Space open, will see the video call pane change. They can click the pane to join the call. Any admin, member or guest can start the meeting.

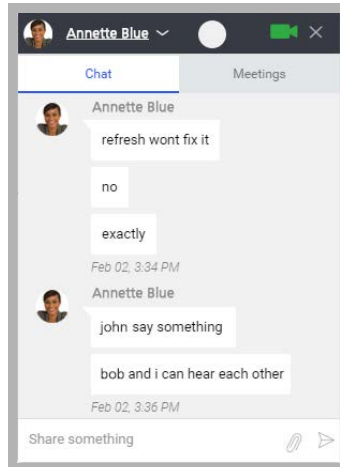

The video conference is in session.

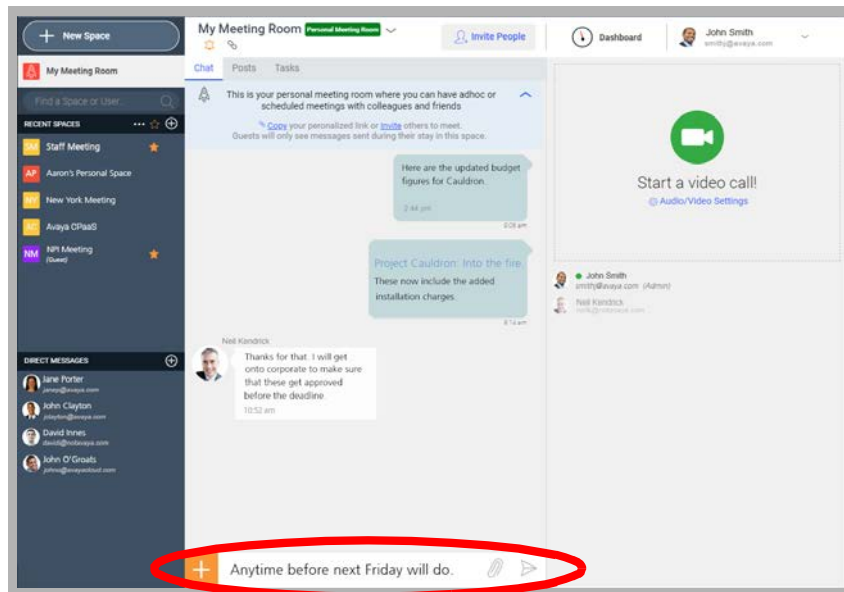

TEXT MESSAGING

Person-to-Person: To send a chat message to a single individual, click their name in your **Direct Messages** pane. This opens a chat window with that person. Enter your message and click **Send**.

Group: To send a message to everyone that is part of a Space, open the Space, go to the Chat tab and type a message at the bottom of the window. Click **Send**.

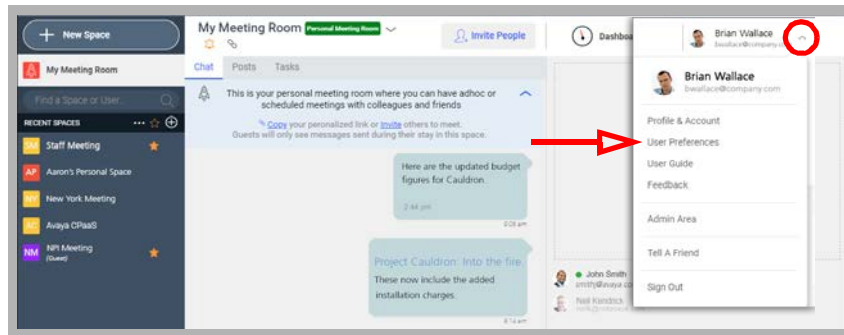

The person you are texting, or everyone in the Space will receive the message the next time they login to Spaces. If they have notifications enabled, a pop-up will appear on their screen in the lower right corner of their Windows desktop (unless they have logged out of Spaces).

Notifications

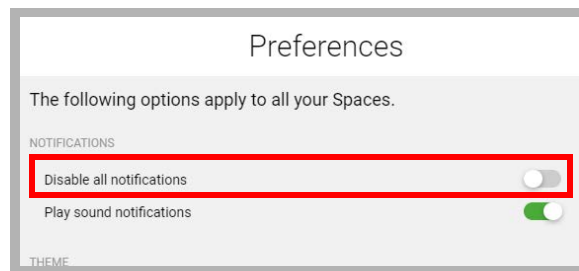

Toggle Notifications On / Off through the **User Preferences** menu.

Turn off **Disable all notifications**. With this switch turned off, users of Spaces will receive pop-up notifications whenever they receive a chat message as long as they are logged in.

Spaces does not have to be open for this to happen.

If this switch is turned on, or if the user has logged out of Spaces, they will not receive notifications until they log in to Spaces again.

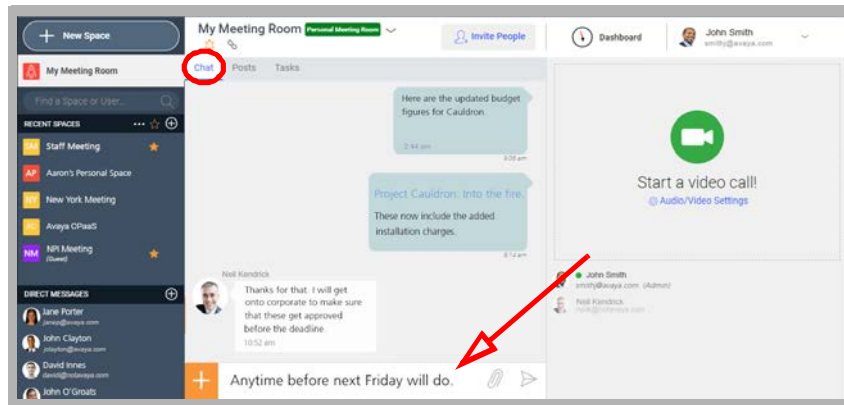

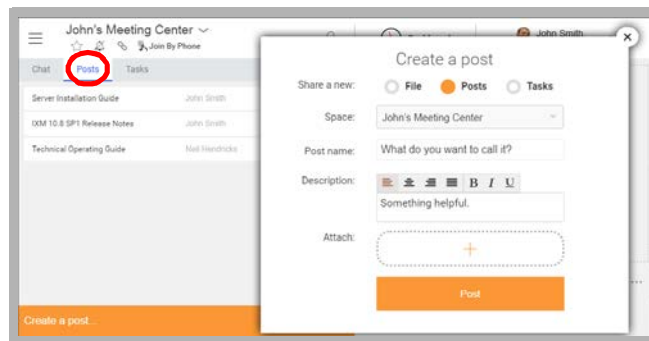

THE TABS

Once you have entered a Space (but before launching a video call), there are 3 tabs in the main window. Members and Admins of the Space can see the entire history for the Space. Guests to the Space can only see chat messages that are sent while they are present, and have no access to Posts or Tasks.

Chat: The Chat tab shows all of the text messages directed at the people in this Space: person-to-person messages are not shown here. Type a message at the bottom of the window and hit **Send**. Everyone in the Space will see the message. Anyone not in the meeting will receive a notification that they have a message waiting.

Posts: Use the Posts tab to share files with the other members of the Space. Items uploaded here are a permanent part of the Space, remaining available until they are manually deleted.

Tasks: When managing a team, use the Tasks tab to assign people to projects and set deadlines. Scheduled tasks, completed tasks, and overdue tasks are all displayed here.
